Lee Hall (1934 – 2017) had a long and varied career in the arts but her deep North Carolina roots always seemed to bring her and her work back to the Tarheel State. Born in Lexington, NC, her abstract expressionist paintings are vivid examples of those traditions while retaining the kind of detail that truly brings a viewer into a specific place and time. A graduate of the Women's College of the University of North Carolina (now the University of North Carolina-Greensboro), Hall was one of the first women to make headway in the post-WWII New York art scene. **Cannon Gallery, Through June 30** - "Highlights: Selections from BRAHM's Permanent Collection". Work by Jax Gaglianese-Woody

**Turchin Center for the Visual Arts**, Appalachian State University, 423 West King Street, Boone. **Mayer Gallery, Through May 4** - "Revelation: Michael O'Neill". "Revelation" supports the mission of the Turchin Center to showcase creative responses to local, regional, and global climate change. All of O'Neill's ethereal landscapes were made in the South. The land bears the ongoing scarification of a deeply troubled history at the same time the photographs reveal the beauty of what yet may be lost if we do not find a more equitable way to care for the lands of which we are the current stewards. **Community Galleries, Through June 8** - "The Anti-Uranium Mapping Project: Shayla Blatchford". The project is an interactive audio/visual storytelling exhibition and website designed to create an efficient way to educate audiences about the environmental issues of uranium mining on the Navajo Nation and surrounding lands. The various components of the project provide an immersive multimodal learning experience. This project serves as both historical documentation of the uranium mining era as well as a platform for storytelling and community building. **Bickers Family Gallery, Through June 1** - "Roots. Ground. Water. Seeds," featuring the 21st Annual Appalachian Mountain Photography Competition., juried by E. Gale Greenlee, Ph.D. "Roots, Ground, Water, Seeds" is an effort to amplify visual artists whose photography considers our many and intertwining ancestral roots; our connection and relationship to the land, the ground we walk on, the lives these lands have supported and the way Appalachian earth demands and yearns for our conscious care. Here, you dip into the waterways and communities that sustain and repair us and witness the seeds that birth new life/futures, rejuvenate our soil and spirits, and spark necessary political change. Here in this place, you/we/I bear witness to a personal and collective archive. Come in. Listen. See. **Hodges Gallery, Through June 1** - "Trophic Cascade: April Flanders". The web of life under the surface of aquatic ecosystems is exceedingly complex and devastatingly beautiful. In a place where species interactions begin at a microscopic level, small changes have huge impacts and huge changes wreak havoc. Remove a key predator, and prey takes over; add another predator, and the first one declines. With the rise of globalization, human mediated transfer mechanisms give rise to invasive species, overwhelming the delicate balance of aquatic ecosystems. These unintended ecological interventions cause Trophic Cascades, revealing nature's fragility. Invasion biology in marine environments is especially fraught. The eradication or management of invasive species on land, while economically and environmentally challenging, is possible. The successful management of these species underwater is nearly impossible. This exhibition addresses the causes and impacts of marine bio-invasers on a global scale, conferring visibility to species normally unseen. **Gallery A and Petti/Peiser Galleries, Through May 4** - "Considering Carbon: Kathleen Thum". "The exhibition, Considering Carbon, consists of a series of drawings and cut-paper wall installations which explore the theme of fossil fuels, specifically oil and coal. In the exhibition, I use different visual and conceptual approaches to examine the physical, material qualities of coal and oil, as I aim to heighten an awareness of our disconnection and dependence on fossil fuels. Oil and coal are an integral part of our contemporary existence, yet remain mysterious, unknown substances, contained and controlled by the industry," says Thum. "Large-scale wall installation artworks in the exhibition consider the infrastructure of the pipeline system through a visual language of abstraction to communicate the vastness of the petroleum infrastructure. In these large cut-paper pieces, I evoke the visceral, sensory quality of the petroleum landscape by using scale, texture, surface, color and the non-traditional presentation of drawings to engage the body of the viewer," adds Thum. Hours: Mon.-Thur., 10am-6pm; Fri., noon-8pm;
